

## Our Vision

To be a destination where researchers can lead innovative, community-connected urban population health research and education.

### Human Capacity

Our staff and faculty have joined the Center because of their desire to use their talents, skills, and expertise in partnership with providers, community leaders, organizations, and residents in *identifying, testing, and evaluating solutions* to the challenges that prevent communities from realizing their full health potential.

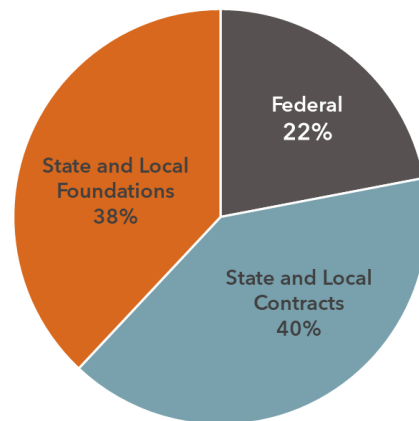

We are a lean organization. We realize our vision and support our founding institutions through providing the administrative and core staffing that support community and affiliate programming. See the break down of staff effort below.

### Financial Capacity

The return on the Center’s mission and joint partnerships translates into a *healthy and sustainable* Center and significant financial support to local initiatives.

#### 2022 Extramural Funding

For *every dollar* invested in the Center by the three founding institutions, *\$9.60 are earned in extramural funding.*

### Over 20 years of growth in community and academic partnerships

2022-23
